DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 04/08/08 have been fully considered but they are not persuasive. Applicants arguments are based on the newly amended claims. Examiner would like to point out that the use of the hyperbolic function does not limit the claims in a way to over come the rejection. Daft reference teaches the use of a hyperbolic function for the transducer elements. Hence the rejection still stands and is made final.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent No. 5,817,023 to Daft.

4. Regarding Claims 1 and 2, Daft teaches an ultrasonic diagnostic apparatus for delay-controlling the ultrasonic wave beams of a plurality of ultrasonic transducer elements linearly arranged in a horizontal direction to a specimen, characterized by: means for deriving the distance from each of said plurality of ultrasonic transducer elements to said convergence positions with from a hyperbolic function wherein the gradient "a" of an asymptote is $0 < |a| < 1$, with the positions in a horizontal direction of said plurality of ultrasonic transducer elements as the variable, and the distance from each of said ultrasonic transducer elements and a reference line to which the ultrasonic

transducer element in the center contacts on the convex surface (Abstract and Fig. 1); and means for generating the driving pulse of each of the said plurality of ultrasonic transducer elements delayed in accordance to said derived distances. (Abstract, Fig. 1 and Claims 1, 2, and 9)

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

6. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
